EDUCATION

University of Tennessee, Knoxville | B.S. Information Sciences, UX Design | GPA: 3.2/4.0 **May 2028**

Relevant Coursework: Python Programming, Data Analysis, Information Systems, User-Centered Design

University of Virginia's College at Wise | Computer Science coursework; Football student-athlete **2024 – 2025**

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS, SQL, C, C++

Frameworks & Tools: Flask, React, MongoDB, Docker, Git, GitHub API, Last.fm API, WordPress, Webflow

Design & Analytics: Figma, FigJam, Adobe Photoshop, Illustrator, UX Research, Accessibility, Excel

WORK EXPERIENCE

Tombras | Incoming UX Analyst Intern **Knoxville, TN**

UX Analyst Intern | Oct 2026 – Dec 2026

- Support usability, accessibility, SEO, and content-quality evaluations by conducting structured website audits.
- Help improve pre-launch website quality by documenting functional and visual defects and contributing to UX reports.

Fibers and Composites Manufacturing Facility (FCMF), UT Knoxville **Knoxville, TN**

Undergraduate Media & Website Design Assistant | Jun 2026 – Present

- Improve navigation, responsive layouts, and accessibility across 6+ WordPress site sections by implementing HTML and CSS updates.
- Communicate technical research to broader audiences by producing website graphics, research features, and visual assets in Photoshop and Illustrator.
- Keep research content accurate and accessible by collaborating with faculty to organize information and publish website updates.

PROJECTS

GitHub Commit Analyzer | Python, Flask, MongoDB, GitHub API, Docker **2026**

- Enable analysis of repository contributions by building a Flask REST API that aggregates GitHub commit data and stores metrics in MongoDB.
- Support repeatable commit tracking and contributor comparisons by integrating GitHub API synchronization, leaderboards, and Docker.

Autm Music Stat Tracker | HTML, CSS, JavaScript, Last.fm API **2026**

- Make personal listening trends easier to explore by building a responsive music tracker with search, friend activity, and localStorage persistence.
- Surface recent plays and top artists, tracks, and albums by integrating asynchronous Last.fm API requests and time-period filters.

Discord Notifications & Search Redesign | Figma, UX/UI Design **2026**

- Reduce friction in finding messages and managing alerts by redesigning Discord notification and search user flows.
- Communicate and test proposed interactions by creating wireframes, high-fidelity mockups, and a clickable Figma prototype.
